Subject: Please Reject the proposal

This message is from an External Sender

This message came from outside the City of Arlington

Please consider rejecting the proposal to establish a Hot Dip Galvanizing Process Plant at 18520 67th Ave near the entrance to my neighborhood. Gleneagle, I worked at a similar facility when I was young, I know the health risks. This Plant will be a health risk to my family and I. They cannot guarantee the fumes from the process at their plant will not blow into our neighborhood. We live in Gleneagle directly above the proposed location. The wind generally blows up from the airport and the flats, This is why they hang glide above our homes. Please protect the future health of my family, the people who will be living in the apartments accross the street from the plant and all of Gleneagle. If the city of Arlington can't stop this we will get a potion started and get the story out to the media and try our best to stop it ourselves. If somehow this gets approved we will be forced to sell our home and move out of Arlington. This would be unfortunate, we are close to retirement and we're looking forward to spending it Golfing and enjoying the best neighborhood in Arlington.

Thanks,
Jack McCord
