Hello,

I'd like to express my concerns for this hot dip galvanizing plants location. I live really close to the Gleneagle entrance and have a young son who spends hours and hours outside. The toxic fumes from this plant will be extremely harmful to all in the vicinity. This neighborhood also houses many older folks, my parents included, who are more susceptible to health problems.

Please reconsider the location of this plant to an area not as populated.

Thank you,
Erin Casey
