Dear Amy

I am a resident of Glen Eagle and it has come to my attention that a proposal has been submitted to the City of Arlington, to establish a Hot Dip Galvanizing Process Plant right on the edge of the community I live in. This has me and my family concerned.

I understand that it is an area zoned commercial industrial, but it is also right next to arguably the nicest neighborhood in Arlington. This neighborhood has a grade school, a public golf course and several city parks. If a plant is established that has any possibility of creating an unhealthy smell or impacting this community in any way, I beg of you to not allow the proposal to advance.
