This letter is in response to the GlenEagle residents at risk for being exposed to toxic chemicals. My husband and I are senior citizen's living on Woodlands Way and are very close to this proposed building....we can see the parking lot...we are concerned about the toxic fumes etc. that could be released either on purpose or by accident, doesn't matter. This is not a place for this type of business. We have COPD and asthma and cannot be exposed to this type or any other type of toxin. It's bad enough we are being surrounded by apartments and homeless without you poisoning us to death.....
