Hello and good afternoon,

To whom it may concern,

Every city needs revenue and possible good paying jobs for residents of the city. My concern with this process is that it's so harmful to work around and live around. Not to mention the impact it has on the environment. I won't even get into that.

The process is very dangerous, and the fumes are what everyone that lives on the hill in and near (Gleneagle) is concerned about. We can smell (cow poop) when Country Green Turf Farms fertilizes as if we spread some ourselves on our own lawns, that's how far the wind takes the fumes. It's overwhelming sometimes but that's also what we signed up for living in the country. This would give the term toxic work environment a whole new meaning. Please also take into consideration the vacant retail down the street at Centennial Park apartments. These have been vacant since being built.

Feel free to call me with any questions,

425-210-5470

Thank you

Please listen to the concerns raised in having such a toxic plant in our city. We all have a voice and raise concern. Please rethink this decision to propose this process in Arlington Wa,
Thank you
