This message came from outside the City of Arlington

Amy,

I hope this message finds you well. I am writing to express a pressing concern regarding the proposed hot dip galvanization process plant's proximity to our densely populated residential area. I just read about this near Glen Eagle, and feel that it is very close to the neighborhoods directly South (near Getchell Hill).

Of particular worry are the potential emissions of lead and zinc be aerosolized, known for their harmful health impacts. Given these risks, I strongly urge a thorough review of the location's suitability and consideration of alternative sites to safeguard our community's well-being.

Your prompt attention to this matter is crucial. Please let me know how we can get further information related to this decision.

Best regards,

Lynzee Schweigert
