Good morning -

I recently received a letter in my mailbox informing me that a hot dip galvanizing process plan and submitted a proposal to open at the entrance of Glen Eagle on 67th.

As a long time resident of Arlington I have grave concerns about this proposal. As a long time asthmatic, the air quality matters and adding a plant so close to the heart of a residential area (not to mention a an elementary school) would have dire consequences.

I fully understand the need for growth, development and job opportunities but please, please reconsider the placement of this latest proposal. I care about the future of my lungs and those of my children, future grandchildren and generations of people.

Thank you for your time in considering this concern.
