This message came from outside the City of Arlington

To whom it may concern;

The proposed idea of using hot dip galvanization at the location very close to the boys and girls club and the Arlington airport is a grave concern to me. The fumes cannot easily be contained, and the amount of children exposed could be a very impressive number. hopefully, someone can come up with an alternative idea for the project that does not include exposing people and children, which I consider our natural resources, to such dangers.

Thank you for your time and consideration of my comments,

Kitty Sue Smith.
