I'm writing in regards to the proposed placement of the hot dip galvanizing plant. The placement is alarming and disturbing to a father of 2 small children both whom go to school and play near the proposed plant location. Data exists showing severe health concerns from vapor created by the galvanizing process. Please consider your own family and health when making decisions like these. I encourage you to find an alternative location for this type of plant further away from residential communities.

Thank you for your consideration  
Leonard
