This message came from outside the City of Arlington

Ms. Rusko,

I am writing to express my strong hope that the city does NOT approve the proposal for a hot dip galvanizing plant on 67th Ave. This is in the heart of residential Arlington, near Gleneagle, the Pioneer Elementary School, the Boys and Girls Club, baseball fields and other areas where citizens and children gather. The proposed plant would release toxic fumes into the air and cause serious health problems for residents. Not only will this plant release toxic fumes into the air, it can also release zinc into the water, causing toxic water problems for residents who are not even near the plant. This processing plant has few benefits, and serious health repercussions for residents.

Please do not approve this plant so near the heart of residential Arlington. It will not bring benefit to our city, our residents or the children of this town.

Thank you.  
Susan Cotton
