Subject: Hot Tip Galvanizing Plant
Date: Monday, June 24, 2024 7:25:26 PM

Hello Amy,

I'm writing to urge you to deny the current proposal for the hot dip galvanizing process plant before you, unless there is a 100% guarantee that no hazardous or toxic fumes and vapors will ever be emitted from this plant, which I doubt is possible. We've been residents of Glen Eagle for over 20 years and our concern is the close proximity to our neighborhood. I am not anti-growth or anti-business. Surely this plant can be located elsewhere in one of the other industrial areas we have in Arlington? I'm certain that many of my fellow residents are concerned as well. Afterall, industrial accidents happen even if all precautions are taken.

Thank you for your consideration.

Sincerely,

*Jerry and Laurie Wilson
