This message came from outside the City of Arlington

Good afternoon Amy & City of Arlington,

I am writing to express my strong opposition to the proposal put forth by the city of Arlington, WA, regarding the establishment of a hot dip galvanizing process plant at 18520 67th Ave. I firmly disagree with this proposal due to the potential risks it poses to my community health and well-being.

A hot dip galvanizing process plant, which produces toxic fumes known to have serious long-term health effects, such as cancer, is unsuitable for the proposed location near residential areas.

I firmly believe that allowing such a plant to operate in this location poses a serious risk to the health and well-being of my community. I urge you to reconsider this proposal and prioritize the safety and welfare of the residents of Glen Eagle and surrounding communities. Alternative locations for metal processing activities that are more appropriate and do not pose such risks to the community should be explored.

Thank you for your attention to this matter.
