Subject: Hot dip Galvanizing process plant

This message is from an External Sender

This message came from outside the City of Arlington

I am writing with a concern of how close this plant is going to be to residential living. I am concerned about the fumes and the health issues that this can bring to the people living close to this plant. Is there not other industrial areas this business could choose from. How will all this be safe for the area? Do you have information to share that gives us more information on this company and there procedures to keep the air around the residents safe? I would love to have the information and I am sure the residents of Gleneagle would also. There are many concerned people. I as of the information I have am apposed to being so close to residential areas.

Thank you for your time
