This message came from outside the City of Arlington

Gleneagle lies directly in the path of prevailing winds, and is in a high density neighborhood and also has a large apartment under construction next door. This type of facility should NEVER be located where any chance of danger exists. Exposure to the toxins can lead to many serious health risks, including cancer. The location is unsuitable. I doubt the City of Arlington is going to want an Erin Brockovich situation on their hands if you proceed with this plan.
