

SMOKEY POINT BOULEVARD

urban neighborhood project

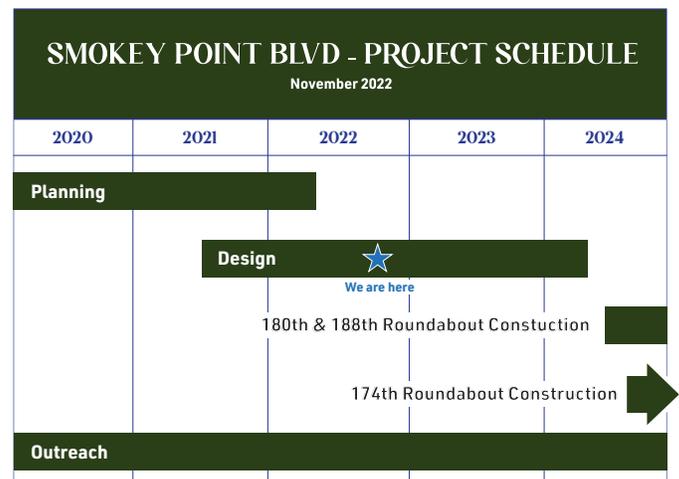

Residential and business growth is increasing throughout Arlington, with much of it occurring in south Arlington and the Smokey Point area. To plan for this, the City of Arlington is designing improvements to Smokey Point Boulevard from 174th Place NE to 200th Street NE. These improvements will support future growth and help create a community corridor and neighborhood feel for small businesses and residents. Once design is complete, planned upgrades will be constructed incrementally.

The corridor improvements seek to enhance safety and develop a community corridor on Smokey Point Boulevard by:

-  Creating a walkable, livable, multimodal urban corridor that also meets the urban transportation needs for the future.
-  Creating an urban corridor with safe pedestrian crossings, artwork, and landscaping.
-  Improve access to and use of the corridor for drivers, transit users, pedestrians, and bicyclists.
-  Increase safety for all users, including pedestrians and bicyclists that may use Smokey Point Blvd in the future.
-  Improve transit facilities in preparation for the new Community Transit Swift Gold Line.
-  Foster the development of a commercial corridor to serve the surrounding neighborhood.

SMOKEY POINT BOULEVARD

urban neighborhood project

Community Engagement and Public Outreach by the numbers

Approximately 3,055 individuals visited our online open house in Fall 2021

280 people filled out a survey and provided feedback on corridor improvements

A postcard was mailed to approximately 1,800 local addresses to provide information about the project and advertise the online open house
