

## STILLAGUAMISH- CULTURAL RESOURCES SURVEY

The property is within buffers for the Arlington Cemetery (SN543) and approximately 1200 feet from the pre-historic burn area of baquab (Kent Prairie). At this time, we are unaware to the extent of land disturbance that has occurred at this location, so therefore, the efficacy results of an archaeological survey would yield. However, there is a possibility that burials could be located outside the cemetery boundaries within the buffers of SN543.

The Cultural Resources Survey will be scheduled during site development. IT will be conducted by a credible consultant that will monitor the trenching for the sewer and water lines at or beyond the 3'-0" for any indications of cultural elements.
